ABOUT ALBIOMA

Albioma is an independent energy producer and world leader in the conversion of biomass into a highly-effective source of energy, in collaboration with its agri-business partners. For more than 20 years, Albioma has operated power plants recovering bagasse, a fibrous by-product of sugar cane, replaced by coal outside the sugar cane harvest. Its unique expertise has enabled Albioma to establish itself as an indispensable partner in the sugar and ethanol industry in the French overseas territories and Mauritius. Albioma is now developing power plants using only biomass, which recover, in addition to bagasse, green waste and wood industry residue. The Group also operates a highly-efficient photovoltaic installation and agricultural anaerobic digestion units. In 2014, the Group, which already had a presence in mainland France, the French overseas territories and Mauritius, began operating in Brazil, the world's leading sugar cane producer.
